

Assessing databases for coding weaknesses to ease a migration

PROJECT

Audit of Lotus Notes environment

MARKET SECTOR

Distribution

PROJECT OBJECTIVE

It was also necessary to test each application with a quality scanning process to see what impact a migration and web enablement would have

Obstacles needed to be overcome

Scanning the existing Notes applications for code weaknesses that would prevent them being easily moved from the existing Lotus Notes v4.5 servers onto the new Lotus Domino ND7 server.

Description of Solution

Running automated test tooling against all Unipart Automotive databases to identify code weaknesses, potential fixes and provide costs for remedying these applications and applying the web interface.

Technologies Used

Lotus Domino 7, internal test tools.

Benefits to the Customer

They were able to assess every database in the environment, and are now confident in their ability to migrate each application using the detailed information provided by the audit report.
