

PWC U.K.

Overview

■ The Challenge

To assist PWC UK in the maintenance of their Domino environment.

■ The Solution

Choosing Bluewave Technology Ltd, a Premium IBM business partner to act as technology partners as advisors in the maintenance and support of their Domino environment. Bluewave Technology Ltd have also acted as close partners in advising on best practice and deployment principles.

■ The Outcomes and Benefits

PWC now has a trusted partner who can help ensure that they gain from the experience of certified consultants who bring a vast amount of experience from sites of similar size and configuration.

The Software Solution Experts

PriceWaterhouseCoopers are recognised as one of the leading Notes/Domino customers, with an infrastructure deployed for over a decade. Their business processes are developed and rely upon Lotus Notes and Lotus Domino.

BE Systems are involved in a number of areas within PriceWaterhouseCoopers. These include the core UK architecture teams as they move to deploy Lotus Domino 8 and standardise the environment. Consultancy services are typically deployed at a high architecture level, though where required, specific skill sets have also been deployed.

Independently, BE System deliver the standardised Notes client build to the global services team. This build is distributed within

PriceWaterhouseCoopers to individual territories and comprises the core of their Notes client in most countries.

Although PWC employ a team of skilled Domino infrastructure experts, they have most recently engaged BE Systems to document the migration strategy that should be followed by all of their offices worldwide.

Bluewave Technology Ltd have also acted as a trusted training partner delivering Sametime training to their technical team.

As with all clients, Bluewave Technology Ltd deliver regular technology updates to promote awareness of the product strategy.
